The development of basic indicators describing the activity of supplier construction enterprises (construction production according to the structure of construction works, employees, workers, wages, labor productivity) according to SK NACE Rev.2, type of ownership, size structure of construction enterprises and according to regions and dwelling construction.

The Statistical Office of the Slovak Republic has been applying changes in methodology resulting from European legislation in the calculation of data for selected sectoral statistics since 2024, and it also utilizes information available from administrative sources, which significantly contributes to the improvement of output. In connection with these changes, data on performance indicators of sectoral statistics (e.g., turnover, employment, earnings, etc.) has been recalculated since 2021.
